Your answer: [Windows Server 2019 Datacenter](#)

Correct answer: [Windows Server 2019 Datacenter](#)

✓ Q4: What operating system is running on Virtual Machine 3?

Your answer: [Windows Server 2022 Datacenter](#)

Correct answer: [Windows Server 2022 Datacenter](#)

Explanation

Complete this lab as follows:

1. Check the operating system of the base computer.
 - a. From the taskbar, select **Start**.
 - b. Select **Settings**.
 - c. Under System, scroll down and select **About**.
 - d. Under Windows specifications, use the Edition to answer Question 1.
 - e. Close the settings app.
2. Launch a virtual machine and check its OS:
Perform the following steps for each of the three virtual machines
 - a. In Hyper-V Manager, select **ITADMIN** on the left side of the application.
 - b. Double-click the VM you want to launch.
 - c. In the Virtual Machine Connection window, select the **Start** button.

- d. Select **Settings** (the gear icon).
- e. Select **System**.
- f. On the left side of the screen, scroll down and select **About**.
- g. Scroll down to Windows Specifications and use the Edition to answer the question that corresponds with the VM you have open.
- h. Close the Virtual Machine Connection window.
